Education

Motilal Nehru National Institute of Technology Allahabad <i>B.Tech in Computer Science & Engineering</i>	2022 - 2026 8.68/10
Sri Bhavishya Junior College, Vijayawada <i>Andhra Pradesh Board of Intermediate Education, Intermediate</i>	2020 - 2022 96.6%
Sri Chaitanya Techno School <i>Andhra Pradesh Board of Secondary Education, High School</i>	2020 100%

Work Experience

Publicis Sapient <i>ASDE intern</i>	May 2025 – July 2025 Bangalore
- Contributed to global telemetry and logging solution using Azure Application Insights for high availability systems as part of an agile (SCRUM) team. - Developed a real-time flight tracking map with React, Mapbox, and WebSockets supporting more than 100+ flights and containerized services on Azure. - Automated end-to-end (E2E) testing using Playwright for more than 5 UI components	

Projects

HealNow: Doctors Appointment & Tele-Health Platform	Source Code Live
- Tech Stack: Next.js, Tailwind CSS, Prisma, PostgreSQL - Built a full-stack tele-health platform enabling patients to seamlessly book and attend real-time video consultations with doctors using Next.js and Vonage API. - Designed role-based authentication and optimized Prisma ORM queries, improving backend efficiency and response times by 35%. - Deployed a responsive and scalable app on Vercel with TailwindCSS + Shadcn UI, achieving zero-downtime releases and enhanced user experience.	
InterviewForge: AI-Powered Interview Preparation Platform	Source Code Live
- Tech Stack: React, Node.js, Express, MongoDB Atlas, Google Gemini AI, JWT, Puppeteer - Built a full-stack SaaS platform that analyzes a user's resume against a job description to generate a match score (0-100), tailored interview questions, skill gap analysis, and a day-by-day preparation plan. - Integrated Google Gemini AI for resume-JD matching and automated interview question generation - Developed an AI resume fixer for ATS optimization with a Puppeteer HTML-to-PDF pipeline, and implemented a 3-tier rate limiting strategy covering general API, auth brute-force, and AI cost control. - Leveraged Claude Code throughout development to accelerate backend architecture, debugging and API design while cutting iteration time significantly.	

Technical Skills

Languages: C++, JavaScript, TypeScript, Python

Frameworks and Tools: Node.js, Django, React.js, Next.js, React Native

Tools & Platforms : Git, Docker

Databases: SQL, MongoDB, Redis, PostgreSQL, Firebase

Developer Tools: Postman, VS Code, GitHub

AI Tools: Claude Code, Antigravity, GitHub Copilot (used for accelerated development, debugging, code review)

Position of Responsibility

Green Club	2022 – present
- Developed and maintained the club website. - Mentored 20+ juniors in Web Development and collaborative development practices.	

Coding Profiles

- Leetcode :Likithkk
- Codechef : liktihk

Achievements

- Secured 946 rank in Leetcode Biweekly contest 143
- Rated **Knight** on Leetcode with Rating 1863.
- Participated in final round Techalytics'25 (IIT BHU).
